Before any business pays for a CRM, I usually start them on a spreadsheet.

Swipe for the breakdown →

01

One master list of every lead, tagged by source and campaign

02

A named owner on the sales team for every lead

03

Status and next follow-up date right next to each lead

04

A weekly summary from the same data. No manual reports

“

After a few months in the sheet, moving to a CRM is easy. The habits are already there.

How do your ad leads reach your sales team today?
