AI sounds generic? The problem is rarely the AI. It's your instructions.

Swipe for the breakdown →

01

Who the audience is and their main problem

02

Voice and tone, including words that are not allowed

03

Real product facts only. No made-up prices or reviews

04

The structure of each post type

05

Examples of good posts and posts that get rejected

A good prompt helps once.
Clear rules help every day.

Does your team have written rules for using AI?
