Small businesses don't need to start with a paid CRM. They need to start with clean data.

Swipe for the breakdown →

01

One row for one lead

02

Must-have columns: date in, source, name, need, status, next step, next step date

03

Dropdown lists for status and source, so the data stays clean

04

A summary tab that counts leads by source and status automatically

05

Color rules that highlight leads whose next step date has passed

“

A simple system used every day beats a fancy system dropped after two weeks.

Do you start with a spreadsheet or go straight to a CRM?
