Many people are disappointed with AI because the output sounds generic. The problem is rarely the AI. It's the instructions.

Swipe for the breakdown →

01

Who the audience is and their main problem

02

Voice and tone, including words that are not allowed

03

The product facts that are allowed, and a ban on made-up prices, reviews or numbers

04

The structure of each post type

05

Examples of good posts and posts that get rejected

A good prompt helps once.
Clear rules help every day.

Does your team have written rules for using AI?
